

We need your input. Please take a few minutes to provide your comments or questions for the USDA RUS Federal Environmental Impact Statement process and return your completed form today or mail by June 29, 2009. Your comments help in the planning and implementation of the project. **Thank you.**

Completing this form will automatically add you to our mailing list. If you prefer to not be on the

mailing list, please check the box below. I do not wish to be on the project mailing list Which meeting did you attend? ____ Please check the following issues that are important to you for transmission line siting. Project Purpose and Need Visual / Aesthetic resources Proximity to residences X Land use (agriculture, residential, recreation) Water resources (floodplains, river crossings) Biological resources (wildlife habitat, raptors) Historic and cultural sites Radio or television interference Noise Health and safety Other: ______ What additional key issues should be addressed when assessing the potential impacts of this project? The need for things like this? I-240-003

Hampton • Rochester • La Crosse 345 kV Transmission Project

	If you own property in one of the proposed corridors, please indicate all the existing uses
	of your property below: Agriculture Residential Conservation Easement
	Commercial Industrial Other:
	Please describe any special uses or circumstances on your property that should be considered when assessing the Project. Please indicate the location of your property.
	trues would be lost, wild life loss.
	,
	In your opinion, what are the most sensitive resources (biological, cultural, recreational, ect.) in the Project area and why?
1-240-002	Aesthetic is the most sensitive resource. A massage new line would be rediculousage
1-240-001	sore. Do nothing. It worse place new/Bigger and more lines on existing poles.

Your comment has been noted. The criteria used to route the transmission line is described in the Macro Corridor Study which is available on the RUS website at:

http://www.usda.gov/rus/water/ees/eis.htm. These criteria and routing process will be addressed in the Draft Environmental Impact Statement. The project is still in the development and planning stages and the utilities have not yet permitted a route for the transmission line.

The Draft Environmental Impact Statement will be available on the RUS website at: http://www.usda.gov/rus/water/ees/eis.htm. Comments on the Draft Environmental Impact Statement will be solicited after its publication.

I-240-002

Your comment has been noted. Potential impacts to the aesthetic quality of the areas surrounding the transmission line will be addressed in the Draft Environmental Impact Statement.

I-240-003

Your comment has been noted. The Draft Environmental Impact Statement will describe, in detail, project purpose and need. The justification document which has been accepted by the RUS is the Alternative Evaluation study which is available at: http://www.usda.gov/rus/water/ees/eis.htm.

	In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?	
1-240-004	NO. The need for the new High Voltage	
l	buer is not explained. Power useage is	
	Decreusing	
	Please tell us how to reach you.
